Lift Pin Certification

M.A. Industries, Inc. certifies that all Lift Pins meet OSHA Directive 1926.704 (c), which states "Lift devices which are embedded or otherwise attached to precast concrete members, other than tilt-up member, shall be capable of supporting at least four times the maximum load applied or transmitted to them". The Safe Working Load for Lift Pins is 5500 lbs.

M.A. Industries, Inc certifies materials used to manufacture Lift Pins meet the following ASTM standards:

1. ASTM D-4101 pp0344b33534z02 for Copolymer Polypropylene
2. ASTM A-615 Grade 60 1" steel reinforced rod.
